Manufactured by Bluewater Defense

# GUARDIAN SLEEP SYSTEM

THE GUARDIAN EXTREME COLD WEATHER SLEEP SYSTEM CONSISTS OF A 0°F GUARDIAN HEAVYWEIGHT BAG, 30°F GUARDIAN LIGHTWEIGHT BAG, A BIVY COVER, COMPRESSION STUFF SACK AND A MESH STORAGE BAG. THIS SYSTEM PROVIDES COMFORT AND WARMTH WHILE ALSO PROVIDING THE USER ENHANCED FUNCTIONALITY IN ENVIRONMENTS DOWN TO -30°F

## LIGHTWEIGHT SLEEPING BAG

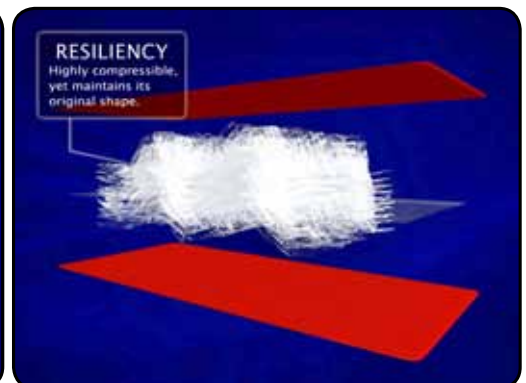

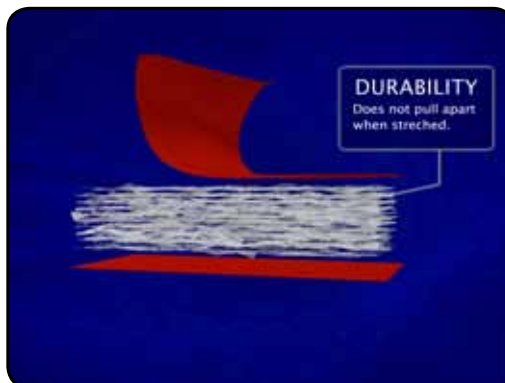

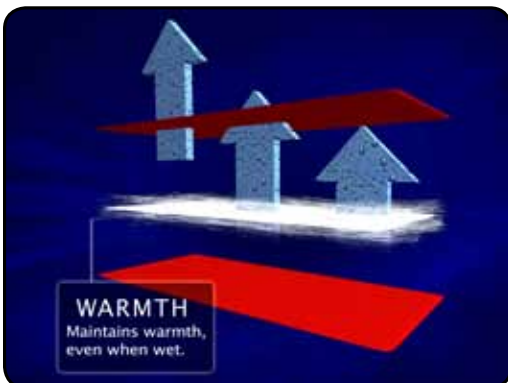

The lightweight bag is designed to ensure maximum comfort and warmth with a roomy cut and is an additional layer between the user and the elements. The lightweight bag can be used alone in warmer climates or in conjunction with the heavy bag and bivy for extreme cold weather protection.

- 40 denier ripstop shell material
- Anti-microbial treated 40 denier ripstop lining material
- Climashield insulation technology for warmth and comfort
- Reversible center front zipper with insulated wind flap to prevent heat loss
- Center front zipper extends all the way down to the footbox for the user to get in and out of either bag with ease
- Adjustable drawstring at face to lock in warmth
- Zip-open armholes to access outside of the bag while staying warm and comfortable
- Exterior pocket to allow the user to fit an object (foam, or inflatable pillows) under their head to use as a pillow for more comfort
- Enlarged footbox for comfort and warmth while static
- The sleeping bags hook together on the interior with a toggle/loop closure to avoid shifting while in use

## HEAVYWEIGHT SLEEPING BAG

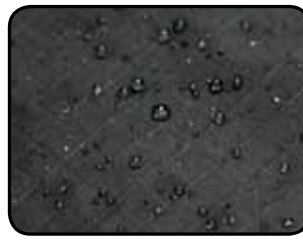

The heavy weight bag consists of double layered insulation to keep the user warm and comfortable in the harshest cold weather climates. The bag construction has been refined to ensure the users warmth is maximized. Armhole zippers allow the user to access all layers of the sleep system and any equipment needed with ease.

- 40 denier ripstop shell material
- Anti-microbial treated 40 denier ripstop lining material
- Climashield insulation technology for warmth and comfort
- Reversible center front zipper with insulated wind flap to prevent heat loss
- Double layer offset quilting construction to eliminate cold spots
- Center front zipper extends all the way down to the footbox for the user to get in and out of either bag with ease.
- Adjustable drawstring at face to lock in warmth
- Zip-open armholes to access outside of the bag while staying warm and comfortable
- Exterior pocket to allow the user to fit an object (foam, or inflatable pillows) under their head to use as a pillow for more comfort
- Enlarged footbox for comfort and warmth while static
- The sleeping bags hook together on the interior with a toggle/loop closure to avoid shifting while in use

## SHELTER BIVY COVER

- 70d, DWR coated waterproof ripstop material
- Fully seam sealed to provide wind and wet weather protection
- Zip open vents on both sides strategically placed for optimum air flow
- Vents have no-see-um mesh to keep insects out and can be fully opened for outside access to equipment, while keeping you dry
- Window at face to view environment from inside of the bag.
- Head area supported by a sturdy aluminum pole to allow the bag to stand up
- Pole is removeable and collapsible for optimum packability
- Extended main zipper for easy entry and exit
- Multiple loops for tie down/staking for a more stable bag when in use
- Enlarged head area for storage space of personal equipment
- Reverse coil zippers with wind flaps for added wind and wet weather protection
- Can be used in place of a single man tent
- Fits each sleeping bag separately or together for ultimate comfort in any environmental condition
- Double layer offset quilting construction to eliminate cold spots. It's in the excel sheet but I didn't see it in the proof

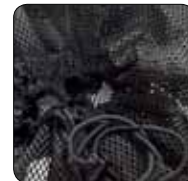

**B** BROOKWOOD  
COMPANIES INCORPORATED

THE SHELTER BIVY COVER PROVIDES PROTECTION FROM THE ELEMENTS WITH FULLY SEALED SEAMS FOR ULTIMATE WIND AND WET WEATHER PROTECTION. WITH A SLEEK DESIGN, THE BIVY IS EASY TO OPERATE AND SET UP. THE OVERSIZED BIVY IS WIDER THAN MOST BIVY BAGS TO ALLOW THE USER TO STORE AND DRY DAMP CLOTHING AND EQUIPMENT WHILE ALSO PROVIDING MAXIMUM COMFORT AND WARMTH WHEN NEEDED.

## MESH STORAGE BAG

- Durable, open mesh, polyester material
- Rectangular in shape
- Cord and barrel lock closure
- Will store sleeping bags, bivy cover and stuff sack while allowing for proper ventilation

## COMPRESSION STUFF SACK

- 500d DWR coated nylon material
- Backpack style storage bag provides easy stowing for sleeping bags and bivy cover while in the field
- Adjustable straps can be used as MOLLE attachment points
- Can be adjusted to any size desired
- Cord with barrel lock closure at top for easy and quick operation
